---

## CAREER OBJECTIVE

Computer Science undergraduate with hands-on experience in Python, SQL, Pandas, NumPy, Excel, MySQL, and Power BI. Skilled in data cleaning, exploratory data analysis, visualization, dashboard development, and extracting meaningful insights from datasets. Currently gaining practical experience through a Data Mining & Analytics Internship. Seeking a Data Analyst / Data Analytics Internship to apply analytical and technical skills in a professional environment.

---

## EDUCATION

B.Tech – Computer Science & Engineering(2024–2028)

Rajshree Institute of Management and Technology, AKTU

Class 12th – U.P. Board(2024) – **86.6%**

Class 10th – U.P. Board(2022) – **91.33%**

---

## TECHNICAL SKILLS

**Programming:** Python, C, SQL

**Data Analytics:** Pandas, NumPy, Excel, Data Cleaning, Exploratory Data Analysis (EDA), Data Analysis

**Data Visualization & BI:** Matplotlib, Seaborn, Power BI, Dashboard Development

**Databases:** MySQL, SQL

**Tools:** Jupyter Notebook, Anaconda, Microsoft Excel, PowerPoint, Word

**Other:** Problem Solving, Analytical Thinking, Communication

---

## EXPERIENCE

### Data Mining & Analytics Intern – UpToSkills

- Working with data using Python, Pandas, NumPy, SQL, and Excel.
  - Performing data cleaning, analysis, and preparation for extracting meaningful insights.
  - Working with datasets and developing analytical solutions based on business requirements.
- 

## PROJECTS

### Customer Shopping Behavior Analysis | Python, MySQL, Power BI

- Performed an end-to-end data analysis project using Python, Pandas, SQL, MySQL, and Power BI.
- Cleaned and analyzed customer shopping behavior data to identify purchasing patterns and trends.
- Used SQL queries to perform business-oriented analysis and extract key insights.
- Developed an interactive Power BI dashboard to visualize important KPIs and customer behavior.
- Presented findings and insights through a structured project presentation.

### Hospital Patient Admissions Analysis | Python, Power BI

- Analyzed hospital patient admission data using Python and data visualization techniques.
- Examined metrics including patient admissions, length of stay, hospital bills, diagnosis categories, and patient satisfaction.
- Created visualizations and dashboard components to communicate important healthcare insights.

## **Face Recognition Attendance System | Python, OpenCV**

- Developed a real-time attendance system using face recognition and OpenCV.
- Used webcam-based image processing for automated face detection and attendance recording.

## **Other Python Projects**

To-Do List, Grade Calculator, Tic Tac Toe, Smile Detector

---

## **CERTIFICATIONS**

- Python Course Certificate – SoloLearn
- Python (Basic) – HackerRank
- Data Visualization – Tata (Forage)
- AI Tools Workshop – Be10x
- C & Python Programming – C Sharp Corner

## **LANGUAGES**

- Hindi
- English
